NATIONAL MINE SHOWS A HEAVY JULY PRODUCTION

The National Mines company for the month of July made its usual shipment of bullion. The Miner is not informed as to the exact amount of the fortune forwarded to the U. S. mint, but taking the number of pigs of gold turned out by the milling plant in Charleston gulch, it has every confidence in the correctness of this guess, viz: about \$145,000.

There is no company report, but recognizing those heavy mail sacks and being pretty sure, just like two and two makes four, that within those sacks were 180 of these gold pigs. Each pig is worth a fraction more than \$800 and thus computed The Miner's computation as to \$145,000 bullion shipment for the month of July is not out of the way. The amount produced is the result of the extensive development work now being prosecuted by the company in pursuance of establishing the real largeness of the mine.—Humboldt Star.

ELKO GAMBLING CASE POSTPONED UNTIL AUG. 16

The case of the state vs. Mayer, Foregor, Johnson, Ah Sin, Ah Jim and the four automobile visitors, charged with violating the anti-gambling law, came up before Judge Klatt at 10 o'clock Wednesday forenoon.

Attorney Caine appeared for all of the defendants and asked for a continuance on the ground of the severe illness of Mr. Bradley. Dr. A. J. Hood was called and testified that Mr. Bradley's condition was serious and that worry over the examination would endanger his life at this time.

On this showing Judge Klatt granted a continuance until 10 o'clock of August 16th.

Mayer and Johnson and the two Chinamen were the only defendants present in court. The matter of

COOL WATER IN THE HOT SUN

No Mr. Sun! Don't Worry! The Water in the APPELL WATER BAG!

Take no Substitute. While in Nevada recently I had occasion to drink out of one of your South African Water Bags. Water from the bag certainly tastes good on the desert. We used one of your 2 1/2 gallon bags and the water remained cool all day, even though the temperature was over 100 in the shade, and in the morning I found the water sparkling and as cold as ice water. It certainly is a boon to those living in the arid regions.

forfeiture of bonds of those who did not appear was held by the request of the defense.

MULE IS FOR SALE AT MOANA

If anybody desires to become owner of a jackass all he needs to do is to communicate with Manager Short at Moana Springs. This is not a matrimonial or gold brick notice, but is a straight proposition.

Mr. Short is tired chasing over the country at the head of a band of employees seeking Miss Maud, the errant little burro that everybody who visits the springs knows full well.

The speed bee in Maud's bonnet has gotten her into disrepute. Last week she wandered around the machines parked in the grove and selected one which had a roomy tonneau with the door carelessly left open.

Maud waited for the chauffeur for a long time and finally fell fast asleep. When she awoke the machine was speeding along and was half way to Steamboat Springs. Maud expressed her pleasure by getting rid of the longest bray ever heard north of Rawhide. The owner and chauffeur, who were in the front seat, almost fainted as the din arose on the silent air of night.

Maud was compelled to alight and she waited for a north-bound car, the occupants of which would not take her aboard, but she galloped in the rear until she arrived safely back at Moana. Meanwhile the search parties had been sent out in all directions.—Gazette.

Maud must have been and exceptionally intelligent jackass or the chauffeur and owner of the car must have procured a fierce brand of booze.

ORE STRUCK AT COMO

Good news continues to come from Como. The word was received last evening that a three-foot ledge of \$450 ore had been cut and that the mine had been sold for the sum of \$450,000. Of this amount \$100,000 has already been paid and the balance is to be paid within sixty days.—Carson News.

A Virginia City man who has just returned from Como states that the Rae mine is most assuredly making good, and a fine ledge has been opened on the 115-foot level. It is from four to six feet in width and runs high in values.

The length of the vein has not been determined, the miners now drifting in and raising in the ore.

A force of 25 men is employed, and two shifts a day put in. The eight-stamp mill and cyanide plant is running to capacity night and day, turning the rich ore into bullion.

It is a curious coincidence that the option held by eastern interests on the property expired a very short time after the ore was first struck and Messrs. Rae and associates refused to extend the same. The result was a deal whereby the mine has been transferred under a bond, and in case the same is not taken up, all the wealth now being taken out reverts to the owners, Messrs. Rae, Baruch and Erickson, Dayton men. Developments to date show the mine to be phenomenally rich, and it begins to look as if a real boom would soon strike Como.—Virginia Chronicle.

ONE OF GREATEST CROP MOVEMENTS IN HISTORY OF R. R.

The Southern Pacific company has practically completed one of the greatest crop movements in the history of any transportation company in this country. This movement was the handling of the canteloupe crop of the Imperial valley, California, and of the crop in Arizona and Nevada. Up to and including midnight, July 24, the Southern Pacific company shipped 2844 cars of canteloupes out of the Imperial valley during the season of approximately two months. About 100 more cars remained to be shipped from this point to the markets.

This record exceeds all previous shipments by approximately 1000 cars. The canteloupe crop of Arizona up to and including July 24, amounted to 403 cars, with about 300 more cars of this fruit to be shipped. About 25 cars have already been shipped from the Moana district in Nevada by the San Pedro, Los Angeles & Salt Lake railroad, about 100 more remaining to be shipped.

Nearly 57,000,000 pounds of ice were required for the shipping of these canteloupes. The biggest day's picking was June 11 when 133 carloads were harvested. These cars were hauled from Brawley, the shipping center, to Imperial Junction on the main line of the Southern Pacific, in one train, the length of which was 6175 feet, considerably more than a mile long. There were 324 crates in each car and 45 melons to the crate, or a total number of 14,580 melons in each car, and in this long train 1,939,104 melons. The largest train load of canteloupes was shipped from the Imperial valley in 1908, 89 cars moving over the Southern Pacific lines to eastern points. When one appreciates the fact that each of these melons was handled at least three times, in picking, wrapping and crating, they can readily imagine the army of men necessary in the field to do this work.

Two and a quarter million dollars is the estimate of value put on the Imperial canteloupe crop, now that the season is near its end. One feature of this year's output is that despite its size, the melons have been of better quality than ever before.

One of the most peculiar funerals that ever took place in Nevada was that which was witnessed upon Lake Tahoe yesterday. A party out fishing upon the lake noticed a launch, with several people on board, at a point near the center of the lake and were attracted to the proceedings by the sound of singing. A Gosepl hymn was sung, after which one of the party in the boat arose and after talking for a few moments, opened a package, which he held in his hands and emptied what appeared to be ashes upon the surface of the water. Another song was then rendered and then the launch returned to the California side of the lake. It is believed that the party was carrying out the wishes of some person who desired to have his ashes scattered upon the surface of the mountain lake.—Carson News.

ASHES SCATTERED ON LAKE TAHOE

One of the most peculiar funerals that ever took place in Nevada was that which was witnessed upon Lake Tahoe yesterday. A party out fishing upon the lake noticed a launch, with several people on board, at a point near the center of the lake and were attracted to the proceedings by the sound of singing. A Gosepl hymn was sung, after which one of the party in the boat arose and after talking for a few moments, opened a package, which he held in his hands and emptied what appeared to be ashes upon the surface of the water. Another song was then rendered and then the launch returned to the California side of the lake. It is believed that the party was carrying out the wishes of some person who desired to have his ashes scattered upon the surface of the mountain lake.—Carson News.
